

# Packexe®

## Time critical glass management for vehicle extrication

### PRODUCT FEATURES

Protecting rescue teams and casualties during road accident rescues, Packexe SMASH holds glass in place, reducing the risk of injury from glass fragments and dust.

### PERFORMANCE

Packexe SMASH makes vehicle extrication safer in 3 ways:

#### Proven to strengthen glass

Tests undertaken by Exeter Advanced Technologies at the University of Exeter in July 2009 prove that the strength of glass is increased by approximately 42%, greatly reducing the risk of breakage under stress.

#### No need to remove glass before cutting

Once Packexe SMASH is applied, the glass is safe. This means that hydraulic cutting and spreading tools can be used to free casualties without the delay caused by prior glass removal.

#### Safe glass removal

In many rescue situations access to the casualty can be achieved most quickly by the removal of a single window or windscreen. If Packexe SMASH is applied first, the window can be broken and removed without danger.

## Packexe® Sharpswrap® Rapid Sharps protection

### Rapid sharps protection for fire brigades and rescue services

- ❑ For use in *any* rescue situation
- ❑ Effective cover for sharp edges and points
- ❑ Reduces injury risk
- ❑ Protects casualties and rescuers
- ❑ Covers metal and glass
- ❑ Quick and easy to apply
- ❑ Up to 50 applications per 30m (100ft) roll
- ❑ High-visibility yellow

**Packexe Sharpswrap** is an extra-strong self-adhesive film for rapid application to hazardous projections, points and edges in rescue situations. It is supplied in a compact roll 100mm wide and 30m long (4" x 100') fitted to a re-usable lightweight applicator.

It can be neatly stored in rescue equipment bags, haversacks or belt-pouches for instant availability when needed and does away with the need for heavy mats or blankets

# Packexe® Protection Films

### Carpets - Rugs

Sticking to the carpet without the need for tape, this film prevents the trip hazards so often associated with dust sheets, especially on stairs. It provides a low-slip surface even when wet, protecting carpets and rugs against spillages, heavy foot traffic, dirt and debris. The film can be vacuumed, swept or mopped throughout the project.

It's strong adhesive grips securely to carpet pile but is easily removed without leaving a sticky residue.

<b>Applications:</b>	Strong Adhesive - Temporary protection of carpets and rugs	
<b>Recommended Usage:</b>	4 - 6 weeks maximum	
<b>Standard Roll Size</b>	625mm width x 25m length	6 rolls per box
	625mm width x 100m length	4 rolls per box
	1250mm width x 100m length	2 rolls per box

**Storage:** Store film at room temperature in dry conditions for 6-12 months away from direct sunlight

### Wood – Laminate – Tile – Stone - Vinyl

Eliminating the slippage, leakage and lack of visibility hazards associated with dust sheets this film provides protection from spillages, scratches, dirt and debris during building, renovation and decoration projects. The film can be vacuumed, swept or mopped top keep the work area clean

It's medium strength adhesive grips securely to hard floors but is easily removed without leaving a sticky residue

<b>Applications:</b>	Medium Adhesive - Temporary protection for wood,	
	laminate, tile, stone, ceramic and vinyl.	
<b>Recommended Usage:</b>	4 - 6 weeks maximum	
<b>Standard Roll Size:</b>	625mm width x 25m length	6 rolls per box
	625mm width x 100m length	4 rolls per box
	1250mm width x 100m length	2 rolls per box

**Storage:** Store film at room temperature in dry conditions for 6-12 months away from direct sunlight

**Packexe®**  
FLEECE  
is re-useable

**Windows – Glass (Internal & External)**

This film protects windows from plastering excess, paint, sanding dust and dirt eliminating the need for scraping the glass and risk of scratching. Its waterproof adhesive grips securely to interior and exterior windows but is easily removed without leaving a sticky residue. **Packexe®** Glass & Glazing is also available in a narrower width for smaller glass areas with a lightweight dispenser for smooth coverage. This film is perforated for easy detachment from the roll.

- Applications:** Medium to Light Adhesive - Temporary protection for use on windows and glass
- Recommended Usage:** 4 - 6 weeks maximum
- Standard Roll Size:**
- |                         |                 |
|-------------------------|-----------------|
| 625mm wide x 25m long   | 6 rolls per box |
| 625mm wide x 100m long  | 4 rolls per box |
| 1250mm wide x 100m long | 2 rolls per box |

**Storage:** Store film at room temperature in dry conditions for 6-12 months away from direct sunlight

**Delicate Surfaces**

This film has a fleece layer that helps to reduce the impact damage from objects dropping on to delicate surfaces, such as wood or tiled flooring. The top layer provides a low-slip surface and protection from spillages, heavy foot traffic, scratching and other dirt and debris. The film can be swept, mopped and vacuumed throughout the project to keep the work area clean. The low tack adhesive makes it suitable for most surfaces and is easily removed without leaving a sticky residue.

- Applications:** Low tack adhesive for temporary protection of delicate surfaces
- Recommended Usage:** Unlimited
- Standard Roll Size:**
- |                           |                 |
|---------------------------|-----------------|
| 625mm width x 10m length  | 8 rolls per box |
| 625mm width x 25m length  | 4 rolls per box |
| 1250mm width x 25m length | 2 rolls per box |
| 1250mm width x 50m length | 1 roll per box  |

**Storage:** Store film at room temperature in dry conditions for 6-12 months away from direct sunlight.

Worktops – Tiles – Polished Surfaces – (Glass/Metal/PVC)

This film protects polished surfaces, tiles, worktops against paint spillages, plaster dust, dirt and debris during renovation and decoration.

Its low tack adhesive clings to smooth surfaces without shifting and simply peels away after use without leaving a sticky residue.

**Applications:** Light Adhesive - Temporary protection for use on polished surfaces and worktops.

**Recommended Usage:** 4 - 6 weeks maximum

**Standard Roll Size:** 625mm wide x 25m long 6 rolls per box  
625mm wide x 100m long 4 rolls per box  
1250mm wide x 100m long 2 rolls per box

**Storage:** Store film at room temperature in dry conditions for 6-12 months away from direct sunlight.

Dispensers

- ▲▲▲ Time and labour saving
- ▲▲▲ Lightweight and durable
- ▲▲▲ Cost effective
- ▲▲▲ Unique compact design
- ▲▲▲ Stair walking ability
- ▲▲▲ Easy to use
- ▲▲▲ Portable carry case for ease of transportation and storage
- ▲▲▲ Adjustable ergonomic design
- ▲▲▲ Quick roll changeover

Available in 625mm and 1250mm options as well as a smaller dispenser to fit Glass & Glazing film of 416mm

- ▲▲▲ The latest innovation from Packexe Ltd certainly has the edge....
- ▲▲▲ The Edge<sup>®</sup> is an ergonomically designed film dispenser that applies narrow strips of film right up to the skirting board or window frame.
- ▲▲▲ Used with the standard Packexe protective films for all flooring types and glass The Edge<sup>®</sup> ensures flooring can be protected across it's full width – ideal for decorators, plasterers, glaziers and DIY'ers.
- ▲▲▲ Can be used as a seam when using Packexe Fleece
- ▲▲▲ Film can be applied by pulling backwards or pushing forwards
- ▲▲▲ Can be used by hand or with the extension pole.
- ▲▲▲ The extending pole applicator and perforated film means no bending is necessary to apply the film.
