Standard(s): EN 13204:2016

Conclusion: * The submitted spreaders, Model SP 5240 CL, GSP 5240 CL EVO, GSP 5240 CL EVO 3, SP 5260, GSP 5260 EVO 3, and SP 5280 did comply with the clauses as evaluated to in accordance with EN 13204. Refer to Report Reference No. SA10873-D7-ENEC-Original, SA10873-D7-ENEC-Amendment-1, SA10873-D7-ENEC-Amendment-2, and SA10873-D7-Amendment-3 for complete evaluation details.

* - Since EN 13204 does not include battery operated rescue tools in its scope, no agency can certify compliance of any battery operated rescue tool to EN 13204. Prior evaluations of the hydraulic portion of the tools by other third party certification organizations are referenced in the applicable test report(s). UL LLC only evaluated the additional applicable clauses of EN 13204 for indicated model(s).

** - Since the spreading distance and/or force falls outside the classification table type requirements, the Model SP 5240 CL, GSP 5240 CL EVO, and GSP 5240 CL EVO 3 cannot be designated as a spreader according to EN 13204. We can, however, certify that the hydraulic portion of the subject tools has been tested and found compliant with the relevant requirements of EN 13204 for hydraulic rescue tools.
